The sympathy expressed for Senator McLaurin by the republican organs is truly touching and certainly solaces the feelings of the gentleman engaged in the hopeless task of republicanizing the southern democracy. - The Commoner.

The biggest trust on earth has been discovered at last. It is the country newspaper trust. They trust everybody, get cussed for trusting and trusted for cussing, and finally get busted by trusting.-Hardin News.

Gov. Dockery will not allow contracts for buildings beyond the money in the treasury or in prospect. But he is getting the finances in splendid condition and all the buildings will go up, and there will not be a cent of increased taxation on the masses. He worked wonders at Washington City and no is doing it here. - Bates County Democrat.

An innovation that must have been most welcome was the announcement of the permanent chairman of the Iowa republican convention that his speech would be found in the morning papers and instead of delivering it he would ask the convention to proceed to the next order of business. It compulsory "leave to . print" were made the rule sale. Office in in convention business would be expedited and nobody would be loser. Wordy politicians could popularize themselves by following the lowa chairman's example.—Minneapolis Times. Superintendent Carrington is rightly urging prominence for the Missouri

Educational exhibit at the World's Fair. He believes that there is no bet. ter way of showing the true progress of a state, either in its physical re sources or its development along more ane intellectual lines. Not fearing th results of comparison, he is anxious t show the world the actual condition o school work in the state as a living moving organization, and not as a dead erystallized process. It is believed that the Missouri commission will give due and careful attention to this phase of the Missouri exhibits,-Columbia Missouri Herald.

Again America scores a distinct victory over England in the field of manufacture, and in a British colony at that. In a test between a new locomotive of English manufacture and an old "engine" built in this country, lately held in the island of Jamalea, W. I., the American "flyer" came out a winner with a lead of seven minutes to its credit. We may now expect to bear a new series of jeremaids from the British as well as the "provincial" press in England's possession in the West Indies, lamenting the advance of American industry all along the line and berating English manufacturers for slewness to recognize and adopt "upto-date" methods in modern industry. -Boston Globe.
